Release Notes

OZP RC1 is a "mashup" of AML and the Army baselines. The requirement was to combine the two releases and produce a functioning baseline for SPAWAR development.

The testing performed was to ensure that the AML and Army baseline functions were not compromised in the release candidate as well as verifying that the features that were mashed up were working as expected.

Features for 2.0.0.0

Changes:

- Configurable classification banners
- Launching widgets that use ExtJS
- IWC Intents to launch widgets in Webtop or new window
- Default width and height for widgets
